PROFESSIONAL SUMMARY

Senior Software Developer with 14+ years of experience across full-stack, front-end, and e-commerce development. Delivered solutions for enterprise clients including American Express, Lego, and AstraZeneca. Strong track record in technical leadership, mentoring, and process improvement.

Australian citizen based in Sydney; fluent in English, Portuguese, and Spanish.

CORE SKILLS

Languages & Front-End: JavaScript (ES6+), React, jQuery, HTML5, CSS3

Back-End & Frameworks: PHP, Node.js, Laravel, CodeIgniter

E-commerce Platforms: Shopify (Liquid), Salesforce Commerce Cloud, SAP Hybris

CMS: Drupal 7, Drupal 8

Email / eDM Development: HTML email production, Outlook/MSO rendering, cross-client QA

Data & Integration: MySQL, RESTful APIs, systems integration

Tools & Collaboration: Git, Jira, Confluence, Bitbucket

Practices: Agile/Scrum, full SDLC, code review, A/B testing, technical documentation

Leadership: Technical leadership, mentoring, stakeholder communication

PROFESSIONAL EXPERIENCE

Senior Developer — Dentsu, Sydney — Aug 2023 – Present

Main client: American Express

- Provide technical guidance across the full SDLC — requirements, design, development, testing, and documentation — for a major enterprise client.
- Own end-to-end delivery of complex application features, working independently with full ownership of technical decisions.
- Maintain long-term code reusability and platform stability; integrate new technologies into existing systems.
- Mentor engineers and lead internal knowledge-sharing sessions.
- Deliver HTML email (eDM) production for enterprise campaigns, coding for Outlook/MSO rendering and cross-client compatibility.
- Built internal HTML/JS/CSS tools (validators, minifiers, diff utilities) to streamline QA workflows.

Technical Lead / Front-End Developer — General Pants Co, Sydney — Oct 2022 – Jul 2023

Clients: Alquemie Group, SurfStitch, Ginger & Smart, Lego, AlphabetSoup, Insight

- Led front-end development across Shopify, SAP Hybris, and Salesforce Commerce Cloud storefronts using HTML5, CSS3, jQuery, and React.
- Managed a conversion-optimisation programme, including A/B test implementation.
- Delivered RESTful API integrations within an agile team spanning internal and external members.
- Managed team workload, workflow, and delivery accountability.

Software Programmer — The Hallway, Sydney — Oct 2017 – Oct 2022 (5 years)

Clients: Rheem Hot Water, Western Sydney Airport, Westconnex, AstraZeneca

- Elicited, analysed, and documented software requirements across multiple enterprise clients; produced development effort estimates.
- Built applications, software frameworks, and websites using PHP, Drupal 7, Drupal 8, and Node.js on the back end, with JavaScript, HTML5, and CSS3 on the front end.
- Delivered integrations between information systems for clients spanning utilities, infrastructure, and pharmaceuticals.
- Assisted with web-based software maintenance, testing, and debugging across a long-running, multi-year client portfolio.
- Authored technical software documentation to support ongoing maintenance and handovers.

Software Programmer — SCE, Rio de Janeiro — Jun 2015 – Feb 2017

- Elicited and documented e-commerce software requirements; estimated development effort.
- Developed e-commerce applications using PHP, OpenCart, Laravel, and CodeIgniter, with MySQL database design and API integrations.

Junior Software Programmer — AM4, Rio de Janeiro — Aug 2014 – May 2015

- Developed applications and websites using PHP and ASP.NET on the back end, with JavaScript, HTML5, and CSS3 on the front end.
- Designed and implemented MySQL databases; built and integrated web-service APIs.
- Assisted with software maintenance, testing, and debugging; authored technical documentation.

Software Development Intern — Imaginatto, Rio de Janeiro — Jul 2013 – Jun 2014

- Built web-based applications and MySQL databases using PHP, CakePHP, and CodeIgniter, with JavaScript, HTML5, and CSS3 on the front end.
- Participated in the full software development lifecycle — requirements, design, estimation, implementation, testing, and debugging.
- Assisted with maintenance of web-based and Android applications.

EDUCATION

- Bachelor of Information Systems — Estácio de Sá University, Rio de Janeiro (2012 – 2016)
- Certificate IV in Project Management — Australian Pacific College, Sydney (2018)
